Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kaye. The reference discloses the invention substantially as claimed; see the Figures. However it does not disclose the claimed size or shape of the mat. It would have been obvious to one of ordinary skill in the art to vary the size and shape of the mat of Kaye to provide the desired decorative effect and desired protection coverage. Concerning claim 9, the term "right" is a relative term depending on the angle from which the place mat is viewed and the cat's head in the article of Kaye may be considered on the upper right periphery of a major portion. Regarding the arguments directed to the size of the projection, since beverage containers may be sized up to about 3-4 inches as stated in the instant specification the projection in the reference's article meets the instant claim limitations

3. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kamel. The reference discloses the invention substantially as claimed; see the Figures. However it does not disclose the claimed size of the mat. It would have been obvious to one of ordinary skill in the art to vary the size of the mat of Kaye to provide desired protection coverage. Regarding the arguments directed to the size of the projection,

since beverage containers may be sized up to about 3-4 inches as stated in the instant specification the projection in the reference's article meets the instant claim limitations.

4. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krass. The reference discloses the invention substantially as claimed; see the Figures. However it does not disclose the claimed size of the mat. It would have been obvious to one of ordinary skill in the art to vary the size of the mat of Kaye to provide desired protection coverage. The term "placemat" in the instant claims does not structurally distinguish over the term "tray" as used in Krass.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
